

## POOL CLOSING CHECK LIST

905-648-2280

88 WILSON STREET, ANCASTER ON L9G 1N2

THANK YOU FOR YOUR PATRONAGE AND WE HOPE YOUR 2011 SEASON WAS FANTASTIC. TO INSURE YOUR CLOSING GOES SMOOTHLY, PLEASE READ THE FOLLOWING:

### POOL CLOSING CHECK LIST

Before we get there please be sure to:

- empty your Sump Well (if you have one) 24hrs minimum prior to closing
- have a sample of your water analyzed 4 days prior to your closing. This will allow adequate time to make any necessary chemical changes to your water.
- leave your gate unlocked.
- leave all necessary accessories out (winter plugs, Gizzmo, winter cover, water bags, accessories for proper installation of your cover)
- leave garden hose accessible and water is turned on from inside house
- power is on to the outside of your house for the pump
- insure the pool has been cleaned and vacuumed before our arrival
- make sure all pets are secure within your house

#### Please note the following:

- If you have a vinyl lock-in cover, it is common that you have extra snaps or liner lock to secure the cover in the coping. Please have these out and accessible for the crew at the time of your closing.
- A water sample should be brought into Lagoon Pools 4 days or more prior to closing so that any balancing of the water's chemistry may be done before closing the pool.
- Salt water pools are recommended to have the salt cell cleaned before storing for the winter. Please book this at the time you book your closing. Additional fee is applicable.
- If you require your pool to be vacuumed at the time of the closing this must be stated at time of booking your closing. There is a minimum fee of \$50 + HST. (The price is determined by the state of your pool and the gravity of the job.)
- **If any of your equipment is not in working order at the time of Closing and we are not able to continue, it will be necessary for you to set up a service call.**
- Pools with a Safety Cover are recommended to have extra chemical of both Algaecide and shock administered to help insure the water gets a boost to fight off the small particles that slip through the mesh causing algae pools. There is a fee of \$30 for us to do this and must be mentioned when booking your closing date. If you choose to add the extra chemical yourself, that works too.
- Please be sure to leave visible instructions for our crew if there is anything specific place to put things.
