

## POOL OPENING CHECK LIST

905-648-2280

88 WILSON STREET, ANCASTER ON L9G 1N2

THANK YOU FOR COUNTING ON US TO START UP YOUR 2011 SEASON. TO INSURE YOUR OPENING GOES SMOOTHLY, PLEASE READ THE FOLLOWING:

### POOL OPENING CHECK LIST

Before we get there please be sure to:

- empty your Sump Well 24hrs minimum prior to opening.
- leave your gate unlocked.
- leave all necessary accessories out (ladder, solar blanket, bucket for cover)
- leave garden hose accessible and water is turned on from inside house.
- power is on to the outside of your house for the pump
- make sure all pets are secure within your house
- notify us if you would like your heater started at time of Opening

Please note the following:

- **Your garden hose will be left on to fill your pool. We ask that you ensure that the water level is monitored and is turned off once the level of water is 1/2 way up the skimmer face plate. Important: If no one is going to be home it is imperative that you let us know so that we do not leave the water running unattended.**
- If you have a vinyl lock-in cover you must store it in a proper container, filled with water and 500mls of concentrated algaecide (recommended). *Do Not store this type of cover Dry.*
- A water sample should be brought into Lagoon Pools 24 hours after pool water has been circulating. We can help to ensure the balancing of your water so that your sanitizer is most efficient.
- Salt water pools will not have the Salt Chlorinator started up. Pool water needs to be a temperature between 60 & 70 degrees and your salt level needs to within operating range before doing so.
- CSA regulations state that only licensed gas fitters may light a pool heater. We can refer you to a licensed individual or you may contact your local gas provider.
- Any debris removed from the top of your pool cover will be neatly stored in a garbage bag for you to easily dispose of.
- **If any of your equipment is not in working order at the time of Opening and we are not able to continue, it will be necessary for you to set up a service call.**
- Safety Covers normally open with much debris in the pool due to the mesh surface. It is recommended that extra chemical be added to the opening process. There is an additional cost of \$30.00 and must be mentioned at time of booking or prior to our crew coming out. Thank you.
