GO TO CHECK LIST.	\$180.00 + HST = \$203.40

CSA regulations state that only licensed gas fitters may light a pool heater. We can refer you to a licensed individual or you may contact your local gas provider. This has been set up by the Technical Standards Safety Authority (T.S.S.A.) in accordance with CSA regulations.

After we open your pool the hose will be left in the pool with the water running. We ask that you turn off the water once the water has reached half way up the skimmer mouth in the pool. **Note:** If no one is going to be home, we need to be told this so that we do not turn on your water. We ask you to proceed once someone is home.

Start-Up Chemicals: concentrated Algaecide, stain & scale control, un-stabilized granular chlorine.

Pools with Safety covers are recommended to double dose both Algaecide and granular chlorine. An additional \$30.00 is applicable. Please mention this at time of booking.
